# Introduction of MSZ-FH

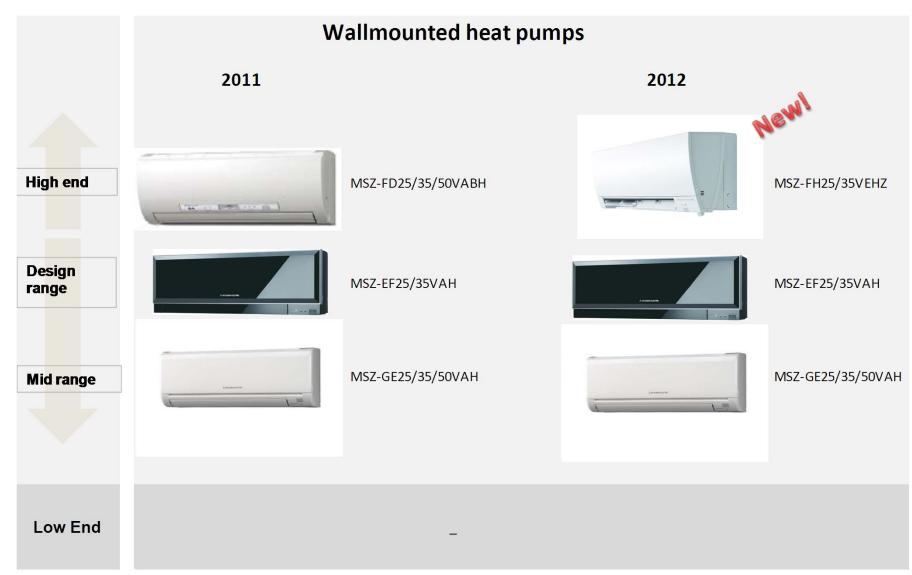

### Introduction

- The success of the MSZ series started in year 2000 with the MSZ-RV, this had a twin rotary compressor and was much appreciated by installers due its silence, this was sold in about 3 000 units.
- In 2002 we launched our first Nordic version units with built in base heater from factory and operation down to -20oC, the name was Nordic star MSZ-YV-VAH. This was sold in 10 000 units in the Nordic region.
- In 2004 we came out with a new unit MSZ-FA-VAH series. This was sold in 25 000 units in the Nordic region. It was with this unit Mitsubishi Electric became one of the largest suppliers in the market of air / air heat pumps.
- In 2007 it was time to launch the successor who became an extreme huge success in Scandinavia, MSZ-FD-VAH. This model, was sold in more than 28 000 units.
- In 2008, an updated version came of the MSZ-FD, VABH who managed outdoor temperatures down to -25oC and had Hyper Heating function (high heating during cold weather). This model have been sold in more than 215 000 units.
- August 2012, Mitsubishi Electric launching MSZ-FH, the new flagship. It have even better performance with lots of new features.
- Thanks to Mitsubishi Electric's innovative capacity and high quality, we look forward to a great trip even with this new FH model.
- In addition, we would also like to add that we have launched over various air / air heat pumps in the "mid range" as MSZ-GA, GB, GE, EF with a great success.
- In total we have sold over 400,000 air / air heat pumps to the consumer market in Scandinavia.

MSZ-FH50VEHZ launched in 2013

## [Line up]

Size	Model name				
	Set	Indoor unit	Outdoor unit		
25	MSZ-FH25VEHZ	MSZ-FH25VE	MUZ-FH25VEHZ		
35	MSZ-FH35VEHZ	MSZ-FH35VE	MUZ-FH35VEHZ		

#### [Key features]

- ✓ Energy rank
  - ✓ ClasA++ in heating
  - ✓ Clas A+++ in cooling
- ✓ COP
  - **√** 5.52
- ✓ SCOP
  - **√** 4,9
- Maintenance heat for second home/garage
  - √ +10oC function
- ✓ Weekly timer
  - ✓ Lower temperature when you are at work
- ✓ Fan Modes
  - Get better heat distribution in the house if you are using a wood stove.
- ✓ 3 D I see sensor
  - Detects people in the room and can effectively control the heat / cold.

- Hyper heating
  - High heating capacity at low ambient temperature.
- Plasma Quad
  - Improved filter function, now also anti virus and bacteria, as well as dust, pollen and odors.
- ✓ Double flap
  - distribute the heat / cold better at such two storey house
- ✓ Operation down to -25oC
  - ✓ Guaranteed operating down to -25oC
- Quiet inddor unit
  - ✓ Only 20dB(A)
- ✓ Power ful mode
  - ✓ Quick heating/cooling

### [Design]

Clean design that blends into the most environments, but is perceived as stylish and modern in its design language

Color: Pure White

Pure White

#### [Dimensions]

Length 925 mm Depth234 mm Height 305 (17) mm

Length 800 mm Depth 285 mm Height 550 mm

### [Nordic custom unit]

The Nordic custom units differ from the standard units.

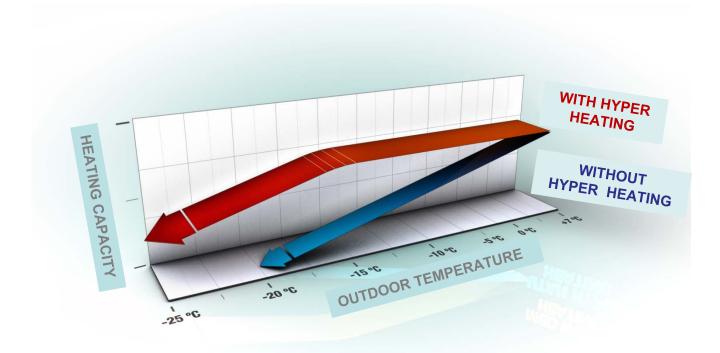

### [Hyper Heating]

With hyper heating, FH supplies very high heating capacity when it's cold outside.

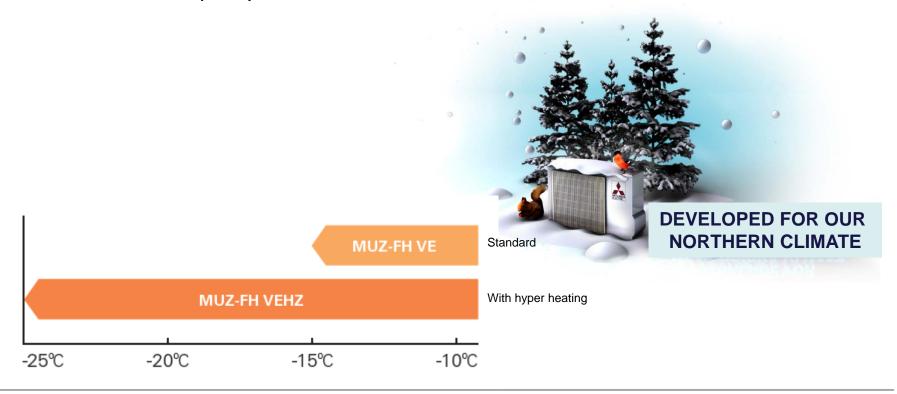

# The outdoor unit is designed to withstand our cold Nordic winters.

- Hyper heating (high heating capacity at low ambient temperature).
- Base heater from factory.
- Customized drip tray so that water more easily drain.

MSZ-FH-VEHZ is designed to withstand outdoor temperatures down to-25oC.

#### [Made for Nordic Climate]

# The outdoor unit is designed to withstand our cold Nordic winters

- **Hyper Heating** (High heating capacity at low ambient temperature)
- Base heater from factory.
- Customized drip tray so that water more easily drain.
- Auto restart after power failure

#### [COOLING with energyrank A+++]

You can also run MSZ-FH as airconditioners the hot summer months.

## [Double Vane]

#### [Double Vane]

With double vane mode, you can obtain good dispersion of heat, even if the house has two floors.

#### [Maintenance heat]

+10oC function for your holliday home.

#### [Weekly timer]

- All FH indoor units are provided with weekly schedule and comes with a remote control as standard. The weekly schedule is set via the remote control.
- Reduce the heat when you are at work to save energy and heat up before you get home.

#### Example Operation Pattern (winter heating mode)

8:00	N 20°C N 18°C
	N 18°C
10:00 OFF OFF OFF OFF ON 18°C O	N 18°C
12:00 Midday is warm	
Automatically turned off during work hours so the temperat set lower	ture is
16:00	
18:00 ON 20°C	N 20°C
Automatically turns on, synchronized with arrival at home  Automatically turns on, synchronized with arrival at home  Automatically raises	to match
22:00 temperature is low	
22:00~ [during steeping hours] ON 18°C	N 18°C
Automatically lowers temperature at bedtime for energy-saving operation at night	

#### [Power ful mode]

 With the push of a button on the remote control gives your FH full power for rapid heating or cooling.

## [Low noise]

- Mitsubishi Electric is known as one of the silent heat pumps on the market.
- Even this model is silent as its predecessor

#### [Auto restart]

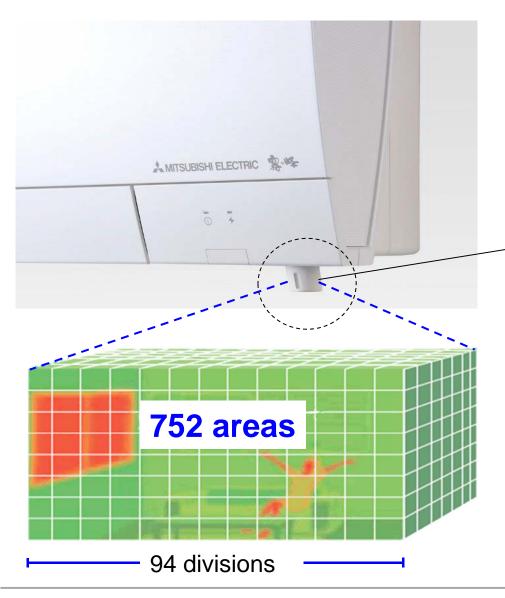

• MSZ-FH is equipped with Auto Restart when such power failure.

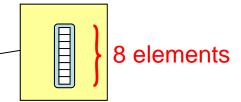

#### **Human sensor**

(Thermopile sensor) watches widely whole the room with 8 elements.

Human sensor can detect **752 areas** in three dimensions.

#### [Avoid drafts]

With human sensor, you can set the remote control directly or indirectly air distribution to people. With this function, you can avoid drafts or if they are frozen to get the heat on you.

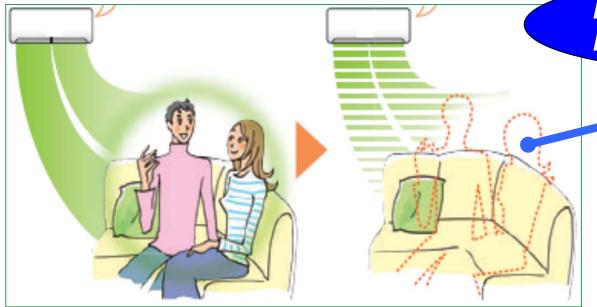

#### [Absence detection]

If you leave the room, the set temperature is increased in cooling or reduced in heating. When you come back to the room, the set temperature returns to the

previous setting.

FUNCTION for ENERGY SAVING!

It is able to detect human absence by Human sensor.

→2 degC change makes 10% energy saving in heating.

Now under development of its control. <u>Our control will be 2 set points!</u> (1~2 degC change firstly. More difference if absent time is long... <u>More energy saving!!!</u>

#### Natural flow

Natural Flow: (only in cooling/fan mode)

Designed air flow with the same wave of the actual natural breeze

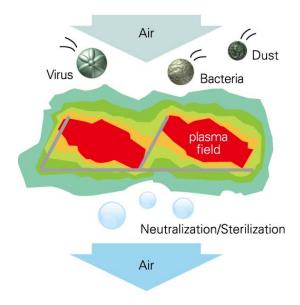

#### [Multi filter: Plasma Quad]

New FH is equiped with Plasma QUAD= Virus, Allergen, dust and Bacteria.

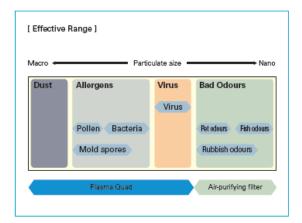

#### [Multi Filter]

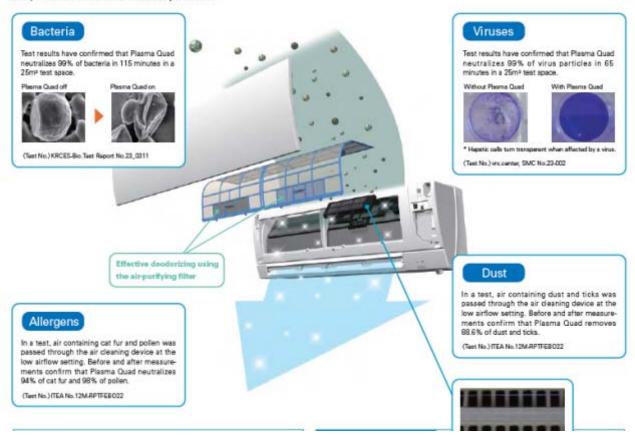

Air, like water, is something we use everyday unconsciously. Yet, clean, fresh air is a vital part of creating a healthy space for humans. Achieving this healthy air is Plasma Quad, a plasma-based filter system that effectively removes four kinds of air pollutants; namely, bacteria, viruses, allergens and dust, which the air contains countless particles of.

#### [Filter (Plasma quad)]

 Can catch bacteria, virus, floating molds and floating allergens and make them inactivated.

Actual performance is tested in the 3<sup>rd</sup> party laboratory. (in 25m3 room)

Floating molds: 99% neutralized

Bacteria: 99% neutralized

Virus: 99% inactivated

Allergen: 94% neutralized

→ Just going through the device!!

Good for air quality! No worry about health of your family!

#### [The test result with Influenza virus]

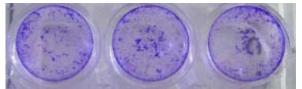

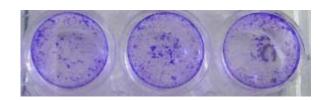

Air was

cleaned!!

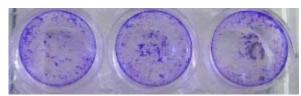

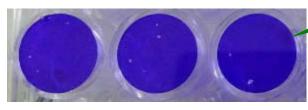

#### 60 minutes later

Plasma device OFF

New Plasma device ON

Collected the air in the room and added the cell of a dog to make the virus parasitize it.

No color (transparence): Many virus exist and infect ability is high.

Blue colored: Virus is inactivated. Clean air.
